

The Coming Eclipse: Or, the Triumph of Climate Mitigation Over Solar Revolution

By Graeme Donald Snooks

IGDS Books. Paperback. Book Condition: New. Paperback. 88 pages. Dimensions: 9.0in. x 6.0in. x 0.2in. THE COMING ECLIPSE deals with the most important issue of our era, and deals with it in a unique way. This book is concerned with a critical choice of futures: either the adoption of a comprehensive climate-mitigation program or the emergence of a new technological revolution. As this book succinctly explains, the adoption of one will eclipse the other. A climate mitigation program of the type proposed by the IPCC will require the establishment of an artificial system of prices, which could only be achieved by establishing a command-like economy. Such an economic system would lock us into the old polluting fossil-fuel technological paradigm and thereby delay, even derail, the newly emerging technological revolution - the Solar Revolution - which will be based on radically new methods of energy extraction. By using a realist general dynamic framework, Professor Snooks shows that, by the end of the twenty-first century, the real dynamic costs of the mitigation program proposed by the IPCC will amount to an astronomical 90 of world GDP rather than the 1-2 estimated by climate mitigationists. Owing to their inadequate methodology, orthodox economists have massively,...
